What is Hospice?

St. Bernardine Hospice Care provides compassionate care in addition to emotional support provided by family and friends. Hospice care services can be provided in the familiarity and comfort of one's home, at a nursing facility, in a hospital, and at an assisted living facility. The Hospice Care staff from St. Bernardine provides excellent medical care and pain management along with emotional and spiritual support designed to meet the wants and needs of the patient and their loved ones. Hospice care is an ongoing service to provide comfort and a higher quality of life to a patient. The goal of hospice care is to enable a patient to have an alert, pain-free life and to live each day as fully as possible. St. Bernardine emphasizes life above death and treats life and death as a natural process, focusing on a holistic approach to treating the patient and the family.

Our Mission

Our mission is to provide patients who are terminally ill and their loved ones the care and support needed in order to live out the final stages of their lives with comfort and dignity.

Our hospice team consists of physicians, nurses, home health aides, social workers, spiritual care advisors, and specially trained volunteers to assist while empowering patients and families with the tools and support needed to maintain independence and quality of life.

St. Bernardine believes that hospice care should be available to anyone who has been diagnosed with a terminal illness or those who have decided not to attempt curative treatment.
